Score: 6.8

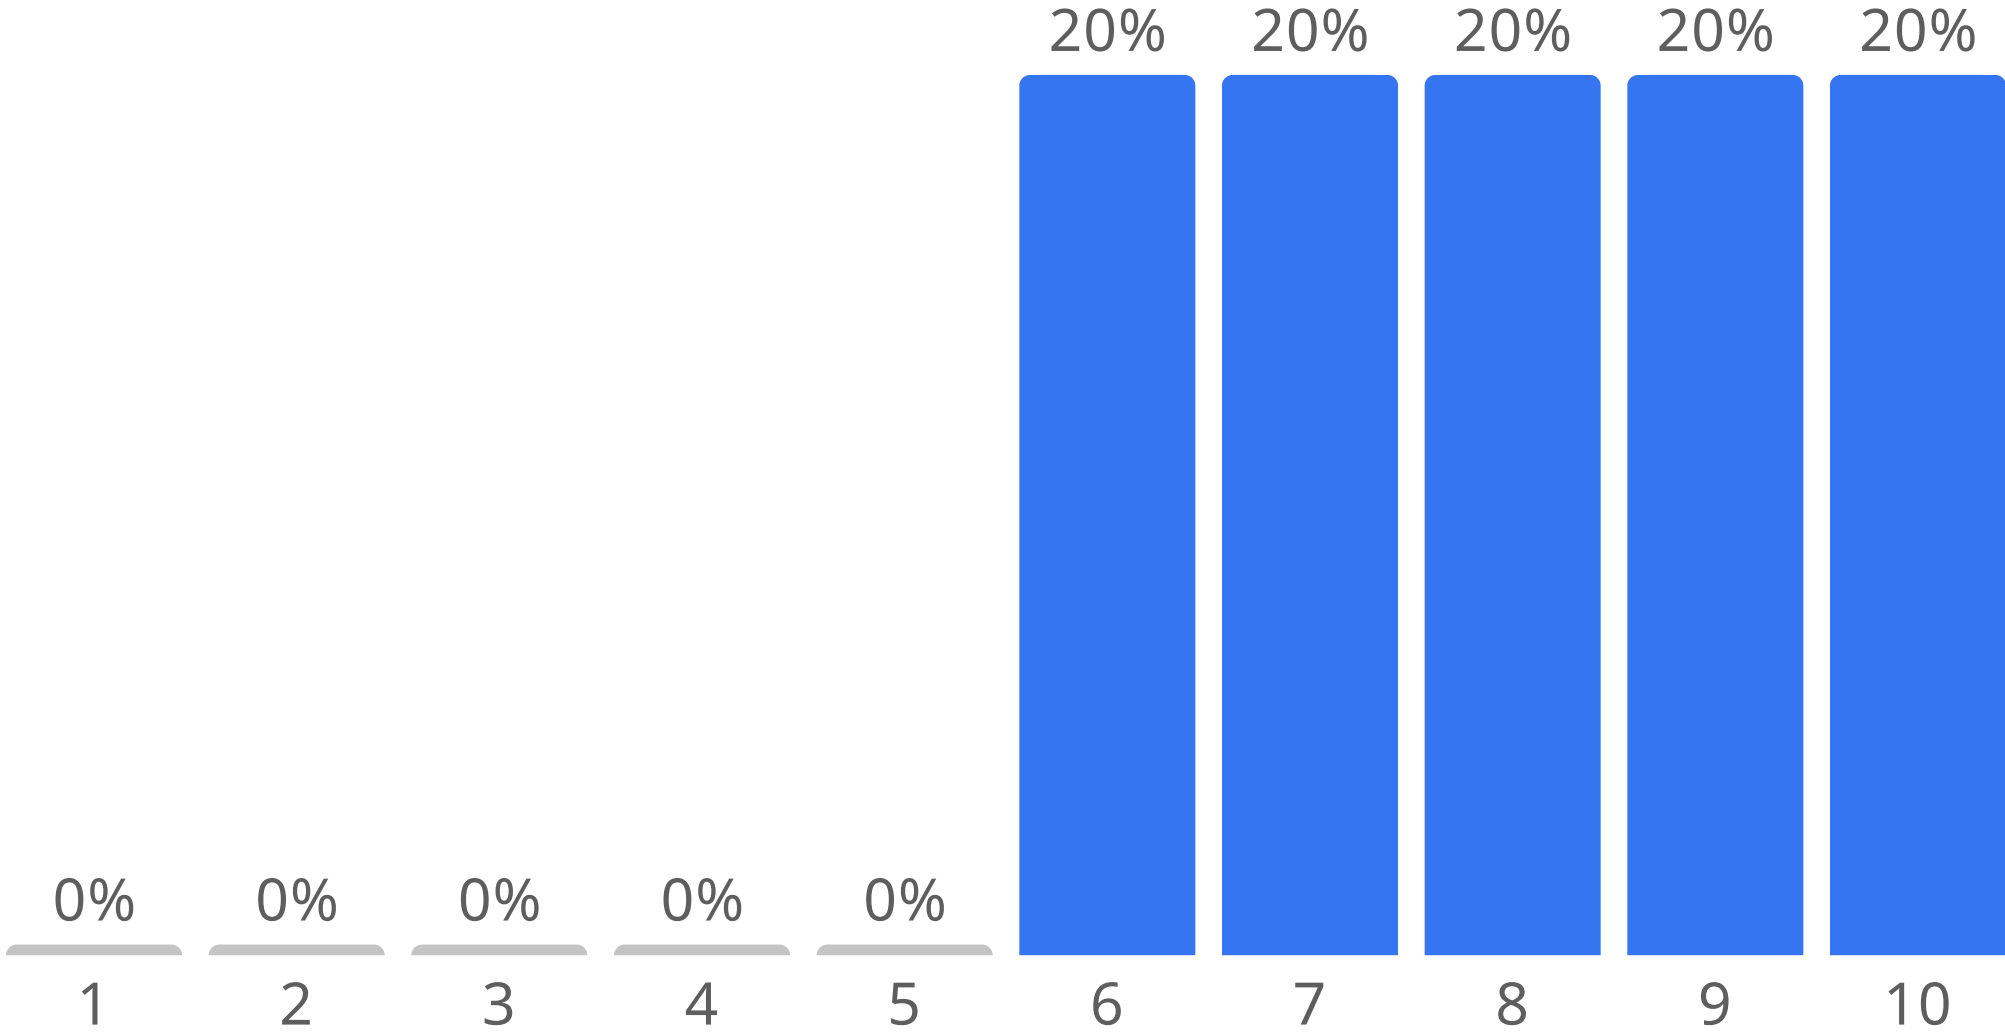

# What I learned will help me in my role/work

Score: 6.0

# I will recommend others who did not attend this session to watch the recording

Score: 8.0

## How could this session be improved in future?

- If Hana had put details of web address for survey at beginning of presentation, it would have been helpful.
- Interesting session. Thank you.
- Nothing, it was very good. (I do struggle to listen to the speaker when I am competing the poll and writing questions).

## Are there any other comments you would like to add?

- Thank you for the presentation it was very interesting. There looks like there are applications in the delivery of components to building sites, and in the design process.  
and I am looking forward to see how this product develops within the construction industry.
- The App certainly has potential in the sector particularly in MMC.
- Digital advances will help the construction industry. It was a shame that more people did not attend the session.
- It was an informative session
