This session held my interest

Score: 8.5

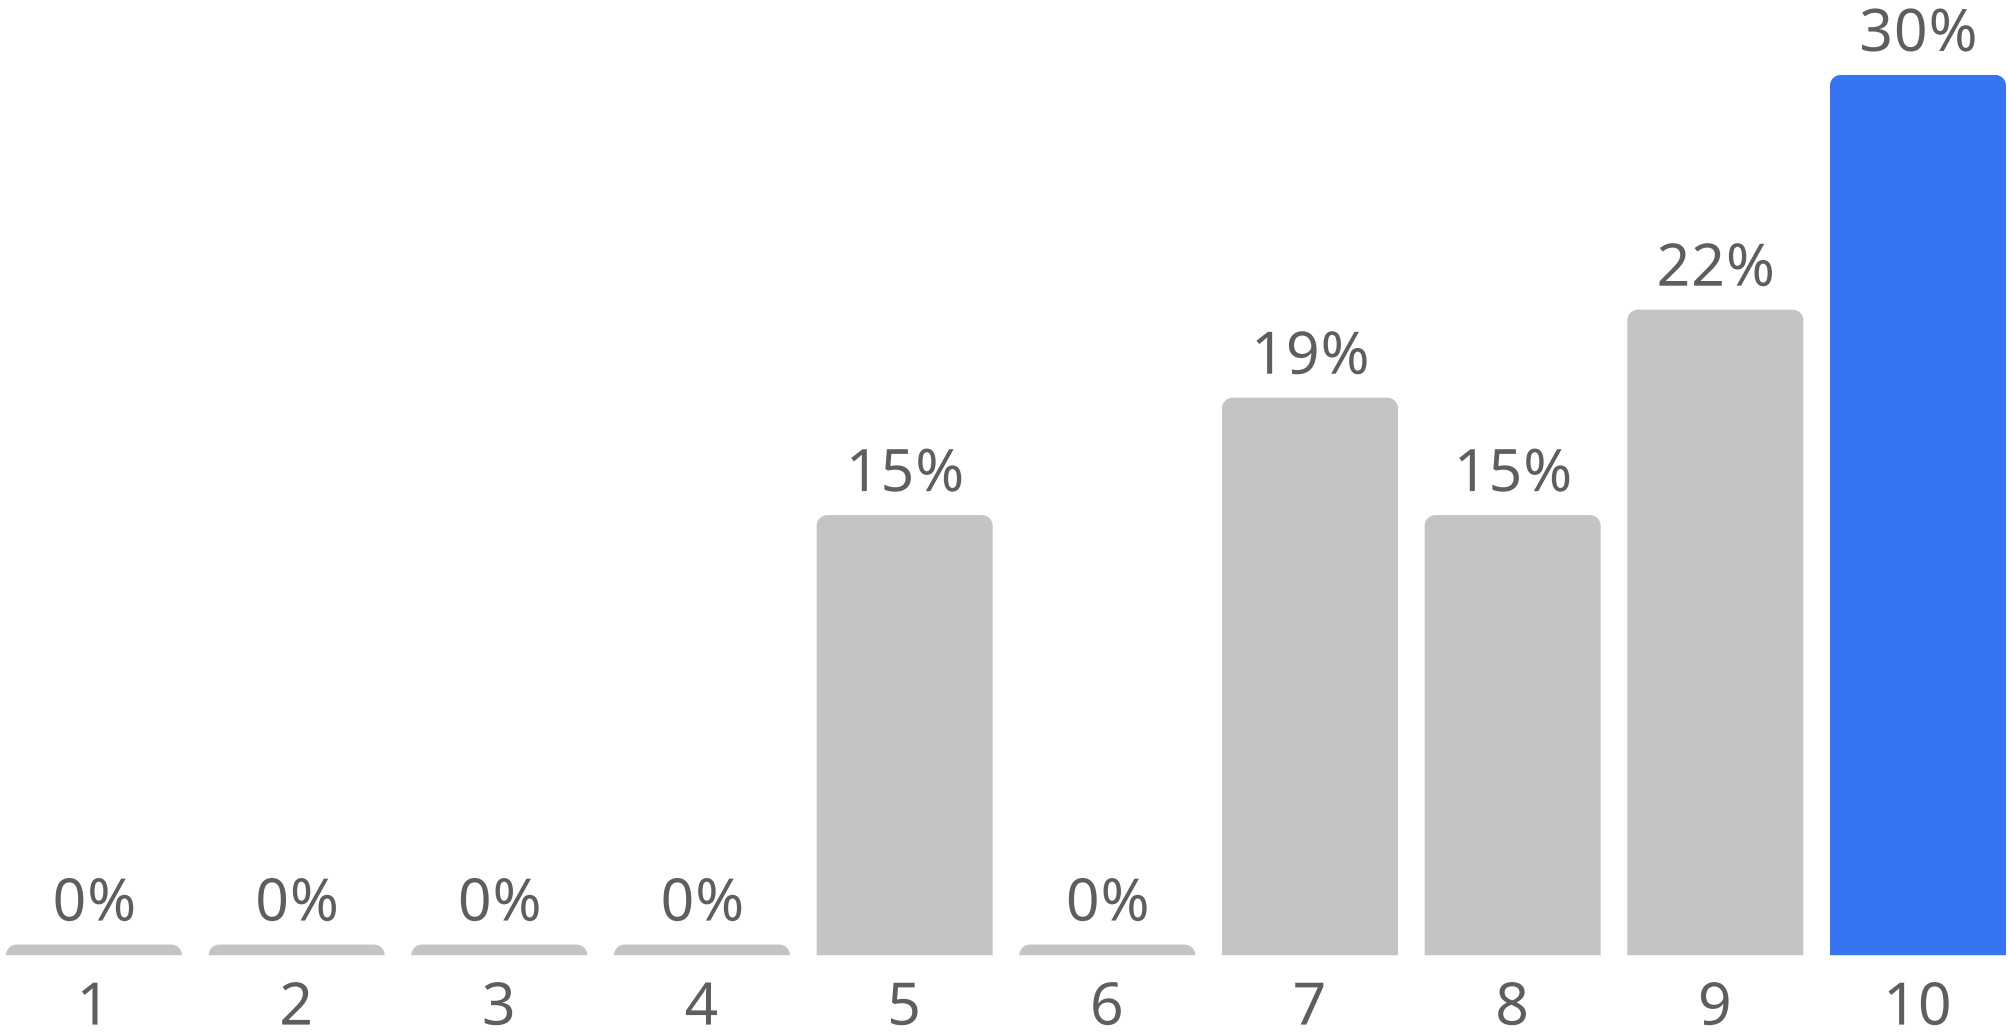

I was encouraged to participate

Score: 8.2

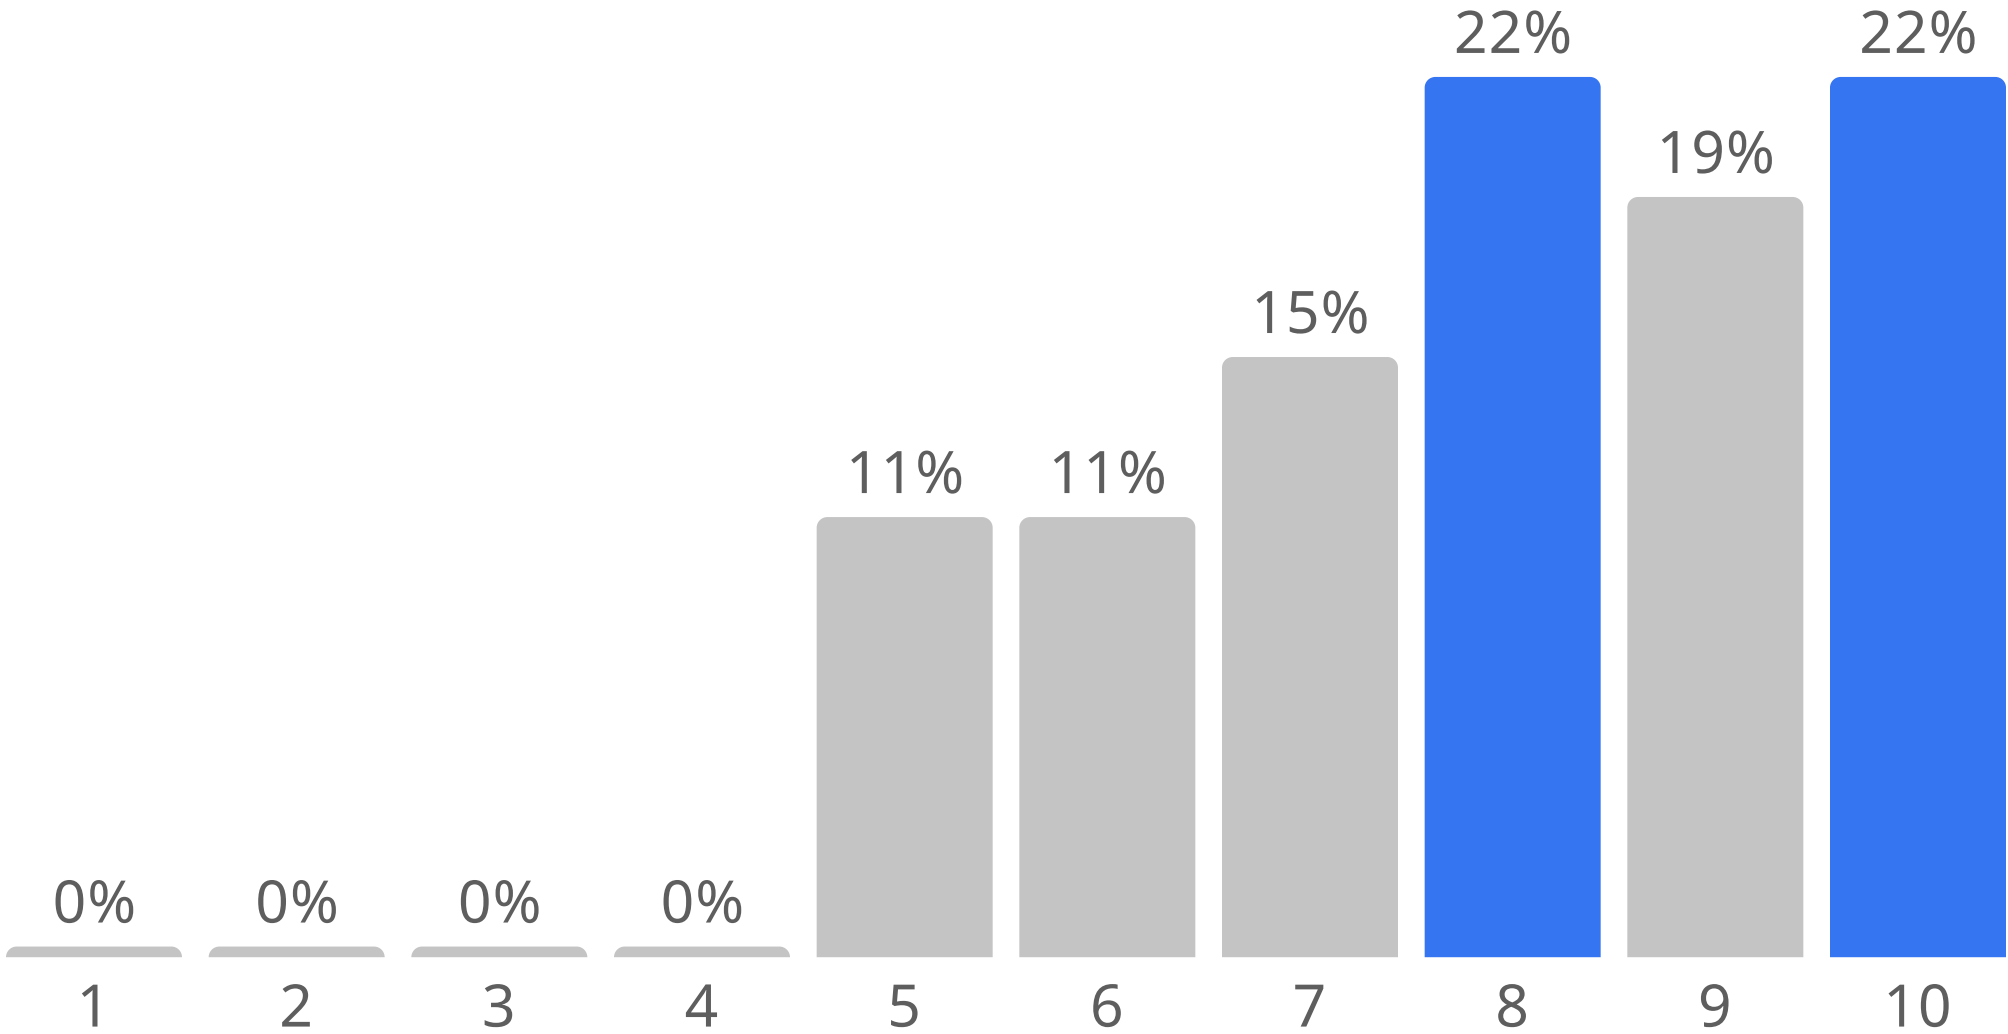

The content was pertinent and relevant to my role/work

Score: 8.2

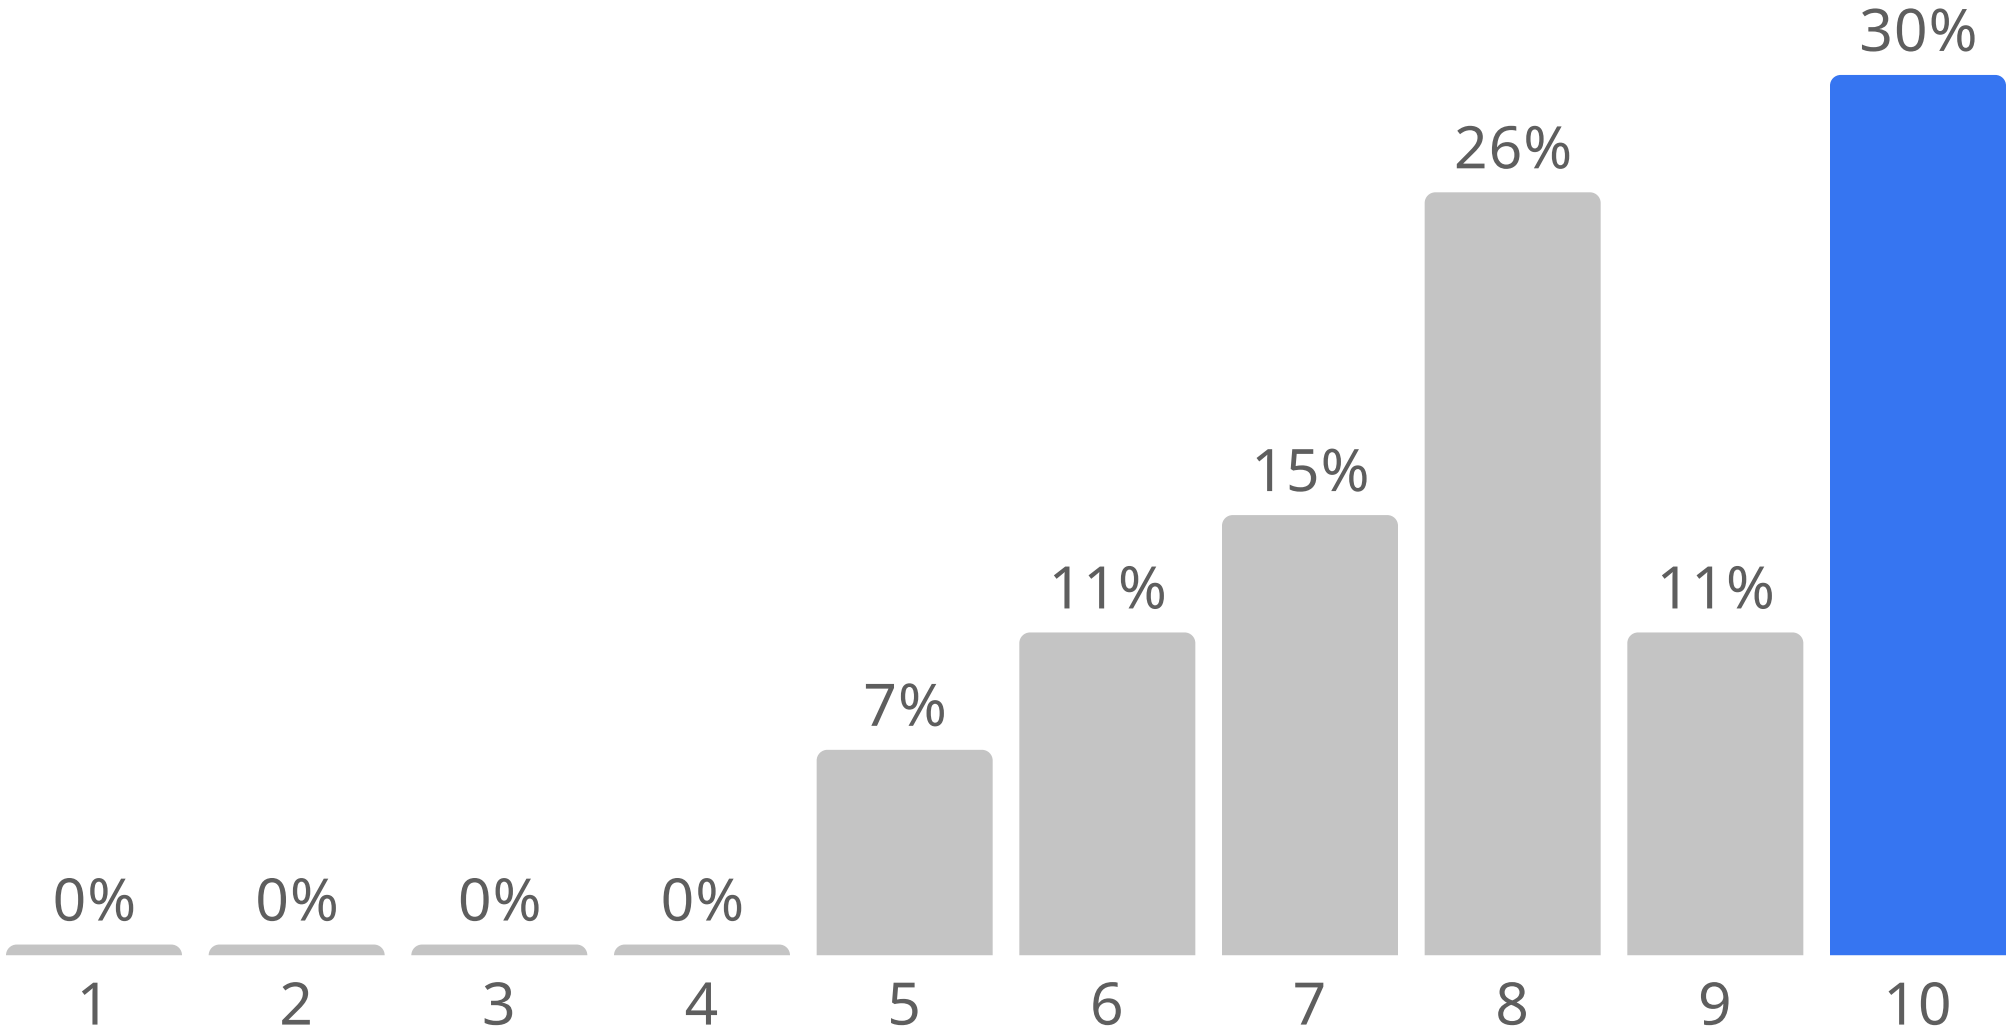

What I learned will help me in my role/work

Score: 7.9

I will recommend others who did not attend this session to watch the recording

Score: 8.1

How could this session be improved in future?

- I was delayed putting the code in right format for slido but worked out well in the end
- Thought it worked well in the time.
- I found the slides and video out of focus. If this was a common problem can Stewart provide his original version of these for the website?
- Would be good to have a session on each of the systems, timber frame, SIPs, etc.
- Can't think of anything, it flowed perfectly.
- Perfect format and slido worked well so wouldn't change
- Perhaps picking one area to do more of a deep dive on, rather than the general review across all areas

Are there any other comments you would like to add?

(1/2)

- Recognising the breadth of the construction industry, it would be useful to hear a presentation on the same topic but from a different perspective. I'm from a civil engineering background and the topic is of interest, but the content was not directly related to my work. It is still of general interest and provokes reflection, and I am glad that I took the time to attend. Thank you.
- I have worked with various modular/timber frame/OSM panel systems including Wimpey TF, MOD SLAM £1.5bn project & TFA projects, the webinar AIMCH by Stewart Dalgarno was very interesting & relevant to me, thank you
- Thought poll was good and got view of 'the room'. Glad to see this being introduced to these sessions.
- Thanks for running these sessions.

Are there any other comments you would like to add?

(2/2)

- Really enjoying these webinars, I hope you don't mind me passing these on to my final year dissertation students at Northumbria University who are researching these topics?
- Very informative, excellent presentation at a good pace, engaging and covered a lot of info without dragging on. Good Q&A
- Hour well spent, very insightful. Thank you!
- Brilliant to see these large players innovating for the future in this way
